+1 720-314-6492 | gunabhiram.a@gmail.com | linkedin.com/in/gunabhiram-aruru | github.com/AruruGunabhiram

Software Engineer | Backend Systems | Java, Python, Spring Boot, FastAPI, PostgreSQL

EDUCATION

M.S. in Computer Science, University of Colorado Boulder | GPA: 3.66/4.0

Aug 2025 - May 2027

B.S. in Computer Science, SRM University | GPA: 3.92/4.0

Aug 2021 - May 2025

EXPERIENCE

PROJXON | Remote, Sheridan, WY

AI Specialist Intern | Jun 2026 - Present

- Built and deployed **OrkaATS**, an internal Google Apps Script/Sheets ATS piloted with **6 recruiters** and **72 candidate records**; replaced manual row searches and status updates with validated intake, stable IDs, recruiter views, and **14 workflow states**.
- Automated **11 weekly searches** and up to **110 results per run** using Python, SerpAPI, PostgreSQL, SQLAlchemy, GitHub Actions, and Google Workspace; produced **5 reports** with a **53-second median runtime** across 10 recent runs and **353 passing tests**.
- Produced OrkaFin's V1-V5 product and systems design, defining UX flows, user-event data, permissions, confirmation gates, auditability, feedback, and security/QA requirements for an AI-agent layer in Orka OS.

InfiniAI Technologies Pvt. Ltd. | Hyderabad, India

Software Engineer Intern | Aug 2024 - Jan 2025

- Built Python data ingestion, validation, and transformation pipelines supporting **3 internal AI projects**, automating repeatable preprocessing workflows and delivering structured data to downstream AI and application services.
- Developed Flask-based REST APIs and full-stack integration components connecting frontend workflows with backend data-processing services, implementing structured request handling, JSON responses, validation, and error handling.

PROJECTS

SocialLens - YouTube Analytics Platform | Java, Spring Boot, React, TypeScript, PostgreSQL, OAuth 2.0

GitHub

- Built a Spring Boot/React platform with **30 REST endpoints** and **9 PostgreSQL/Flyway entities** for YouTube OAuth, incremental channel/video synchronization, idempotent daily snapshots, and 7-, 30-, and 90-day trends.
- Implemented AES-256-GCM token encryption, retry/quota handling, Docker, and GitHub Actions CI; backend and frontend suites total **439 passing tests**.

IncidentPilot - Approval-Gated Incident Investigator | Python, FastAPI, Pydantic, Gemini API, Pytest

GitHub

- Built a custom sequential workflow that analyzes CI logs and repository snapshots, verifies file/line evidence, and generates structured root-cause, remediation, and regression-test reports.
- Added secret redaction, path guards, safety gates, human approval, and GitHub dry-run issue creation; **438 tests** pass and all **8 evaluation cases** meet expected outcomes, including 2 safe failures.

Clinical Reconciliation - Medication Review Platform | Python, FastAPI, React, Supabase/PostgreSQL, Docker

GitHub

- Deployed frontend and backend services to Vercel with medication validation, confidence scoring, approve/reject workflows, API-key authentication, LRU caching, and Supabase review persistence.
- Added deterministic fallback, error handling, and Docker Compose for reproducible local deployment; live application.

LEADERSHIP

Graduate and Professional Student Government, CU Boulder | Boulder, CO President of Outreach | Apr 2026 - Present

- Represent a university-wide constituency of **6,288 graduate students**; lead a **three-member Outreach Team**, recruit campus representatives, and initiated GPSG's partnership with Career Services for graduate-focused programming.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL; C++ (coursework)

Backend: Spring Boot, FastAPI, Flask, REST APIs, OAuth 2.0

Frontend: React, HTML, CSS, React Native, Flutter, Bootstrap, TailwindCSS

Databases: PostgreSQL, MySQL, Supabase, Flyway

Testing and Core CS: Pytest, JUnit, Vitest; Data Structures and Algorithms, Object-Oriented Design, Database Systems

AI Systems: RAG, LLM APIs, structured outputs, guardrails, human-in-the-loop workflows

Cloud and DevOps: Docker, GitHub Actions, CI/CD, Gradle; AWS S3, EC2, RDS and IAM through labs

PUBLICATION

Computer-Aided Lung Cancer Diagnosis Using Deep Learning | IEEE, 2025 | **94% classification accuracy** | IEEE Xplore
